

1
2 BUSINESS METHOD FOR SECURE DOCUMENT FOLDER DISTRIBUTION
3

4 Abstract of the Disclosure
5

6 A system, method, and computer readable medium for a
7 business to securely distribute potentially large
8 collections of document folders (180) to recipients (140).
9 The system comprises a sending device (160) for sending the
10 document folders (180) and temporarily storing the document
11 folders (180) on a network (120) of interconnected
12 computers (170), a destination computer (170) for
13 accumulating the sent document folders (180) destined for a
14 particular recipient (140), and a receiving device (130)
15 for receiving the accumulated document folders (180) from
16 the destination device (170). The method comprises the
17 steps of sending the document folders (180) to a network
18 (120) of interconnected computers (170); notifying each
19 recipient (140) of an electronic document folder (180) by
20 means of an indirect reference to the electronic document
21 folder (180); selecting a destination location (170) for
22 the electronic document folder (180) using data supplied by
23 the recipient (140); and accumulating the electronic
24 document folders (180) at the destination location (170).
